DELIVERING PROGRAMS
ON TIME, ON BUDGET, AND TO CLIENT EXPECTATIONS

July 2024: Get to Know Front Line Advisory Group

Front Line Advisory Group, “FLAG”, is a Program Management Consulting firm transforming client expectations for capital improvement bond programs.

FLAG provides program management consulting services for capital improvement bonds. FLAG is revolutionizing the construction industry and transforming client expectations by obsessing over the basics of budget oversight, schedule enforcement, compliance, vendor management, and stakeholder communication.

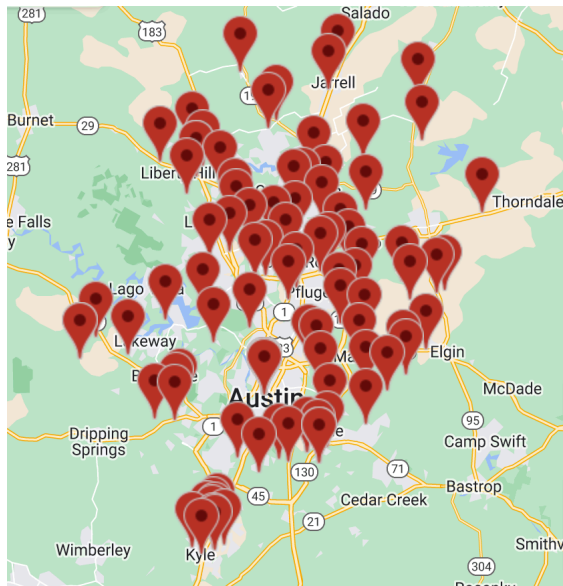

What Do We Believe?

The construction industry is known for completing projects over budget and off schedule because the traditional core competencies in the industry are engineering and construction, not finance, schedules, compliance, vendor management, or communications. By focusing our framework on these competencies, we can transform the perception and expectations of the construction industry. It's time for the construction industry to get uncomfortable.

What Do We Want?

- To be the benchmark of excellence for capital improvement bond program management
- To deliver 100% of our projects on time, on budget, and to client expectations
- To help shape the future of our community
- To completely change the concept of how owners manage capital improvement bond programs
- To revolutionize the client experience in the construction industry
