May 2024: Discoveries at the IBTTA Technology Summit

Front Line Advisory Group recently attended the IBTTA Technology Summit, diving deep into the latest advancements in toll technology. The event showcased innovative projects, including IBTTA's collaboration with the Georgia toll agency and a notable session on women in leadership, highlighting an all-female C-suite team. One of the exciting discussions involved a large language model product designed to query and analyze extensive database content for real-time project visuals and updates. The summit was a valuable opportunity to explore the cutting-edge developments shaping our industry!

Introducing the newest members of the FLAG team!

At FLAG, we are passionate about making a difference in the world by helping our clients deliver critical infrastructure projects that improve the lives of communities across the country. We're also committed to creating a workplace where our employees can thrive and reach their full potential.

Please join us in welcoming the new and highly reputable additions we've made to the FLAG team!

FLAG Foundation: MBA Project Collaboration

FLAG is proud to announce our collaboration with **Texas State University's MBA project team**. The students developed a creative solution and detailed analysis to enhance our client education and engagement strategies. Their innovative approach focused on promoting FLAG's range of services and opportunities, particularly our Weekly Status Report (WSR) initiative aimed at improving permit system reporting.

For those interested in partnering with Texas State University on similar MBA projects, more information can be found [here](#). We highly recommend engaging with their talented students for fresh perspectives and impactful solutions.
